

NEWSLETTER

LET'S COLLABORATE

We're currently open to:

- Pilot partnerships
- Community-based system design projects
- Research + evaluation collaborations
- Custom software builds

Interested in working together? Let's set up a 20-minute conversation.

TECHNOLOGY IS NOT THE SOLUTION—TRUST IS

In our work one theme is clear:
Technology only works when people trust it.

That means:

- Clear data ownership
- Respect for client privacy
- Simple, usable interfaces
- Systems that reflect real-world workflows

At Kyntrix, we don't just build software—we design systems people actually use.

HIGHLIGHTS THIS MONTH:

- Feature Story: Making Invisible Work Visible
- Product Spotlight: Safe Visit App
- Community Impact: Supporting Multi-Agency Collaboration
- Innovation Update: Human-Centered Digital Systems
- The systems will be available on the website soon

Founder's Note

This month has been a reminder that meaningful systems take time to build. Balancing research, community work, and product development isn't easy—but it's worth it.

We're committed to creating tools that:

- Reduce burnout
- Improve coordination
- Support real human needs

Thank you for being part of this journey!
